Course of the Month - Psychology of Criminal Profiling Diploma

Our BRAND NEW **Psychology of Criminal Profiling Diploma** has only been available for one short month but has been flying off the shelves since its release! This fascinating Diploma with its many gripping modules has proven to be extremely popular with our learners so far.

Every criminal act is committed by a criminal and in seeking to understand the workings of the criminal mind and its motivations, investigators have increasingly turned for assistance to what is now popularly known as **psychological profiling**.

This investigative discipline is based on the belief that a criminal does not just leave physical clues at the scene of the crime but that he also leaves psychological clues. By careful examination and consideration of these clues the skilled profiler endeavours to build up a picture of the likely offender. A skilled profiler combines common sense, observation, background knowledge and geographical factors with a sound knowledge of psychology in his efforts to profile a killer.
